

# ICSB 2009

The 10th International Conference on Systems Biology  
Stanford, California, Aug 30 - Sept 4, 2009

August 2009

Welcome to Stanford for ICSB 2009!

We are very excited to have you with us on the Stanford campus. The 10th International Conference on Systems Biology continues an annual series of conferences initiated by Hiroaki Kitano in Tokyo in 2000. The most recent meetings were held in Yokohama 2006, in Long Beach 2007, and in Göteborg 2008. Each ICSB has offered some of the most exciting advances in systems biology, and this year we are fortunate to have another terrific lineup of speakers, sponsors and participants.

Stanford University is situated in the San Francisco Bay Area, birthplace of both recombinant DNA and the personal computer, and home to major academic and industrial efforts in vital aspects of systems biology, notably biotechnology, informatics and computing. We hope that you enjoy the program, that you take advantage of the opportunity to meet with our visitors from around the world and that you have time to enjoy the beautiful surroundings that the Stanford University campus has to offer.

If there is anything we can do to help you during your stay with us, please do not hesitate to ask.

Sincerely,

ICSB 2009 Organizing Committee
